PRESS RELEASE

01.01.2023

New team structure at Tareno Global Water Solutions Fund

The Tareno Global Water Solutions Fund was launched in September 2007. Since the beginning, an experienced and well-coordinated management team has been responsible for this special investment portfolio. At the beginning of 2023, there will be two changes in the fund team. Firstly, there will be an internal personnel change. From now on, Katja Ackermann will manage the fund together with Stefan Schütz as fund manager, taking over the role of Sybille Wyss. Secondly, we were able to gain a new member for the advisory board.

1. Katja Ackermann now acts as fund manager

Katja Ackermann has been working at Tareno since 2016 and has been part of the investment team of the Tareno Global Water Solutions Fund since 2017. As an ESG analyst, she is responsible for implementing the fund's sustainability strategy and will continue to perform this function.

Sybille Wyss will step back from the active management of the fund, but will continue to lead Tareno's asset management. The experience and expertise of the entire team gathered over the many years will thus remain available after the change.

2. New member of the advisory board

We are also very pleased to welcome Dr. Inna Amesheva as a new member of the Advisory Board of our Tareno Global Water Solutions Fund. Inna brings a wealth of experience in sustainability and regulation and will be a great support to us as we face the increasing demands of implementing and achieving sustainability goals. She replaces Dr. Matthias Retter, who has accompanied us for the last 6 years in the area of sustainability. We would like to take this opportunity to thank him for the good and helpful cooperation over the past years.

About Tareno AG
